Customs Experts & Consulting Services

Top global expertise to assist in
Capacity Building, Systems Development,
and Customs Modernization

TTEK staff and associates include many of the following fields of expertise: customs modernization, border commercial re-engineering, electronic single window, customs capacity building, maritime security, business process re-engineering, change management, business transformation architecture, intelligence program development and support, and risk management. Our Subject Matter Experts (SMEs) provide guidance on the design of border solutions, specifically in customs modernization and capacity building for policy/legal review, systems development and integration, and operational program initialization and support.

Global Representation

Our experts come from all over the world including, Canada, U.S., Australia, U.K., Barbados, Philippines, Romania, Ireland, St. Lucia, Vietnam, New Zealand, among many more.
